

HospitalWorks

An Online Integrated Hospital Management System

Simplifying Business of HEALTH CARE

Overview

HospitalWorks - A comprehensive Web-based Hospital Management System for a hospital that wants to keep ahead of its competitors. HospitalWorks helps the hospital staff in providing better services to their patients. The system can be used by large, mid-size, and small hospitals alike as well as multi-specialty hospitals because of its flexible and scalable design. The intuitive GUI helps in minimizing training requirements leading to quicker adoption of the system.

HospitalWorks integrates well with any kind of medical equipment and makes viewing X-Rays and CT scan possible from any computer in the hospital. Top management requires timely information to make valuable decision for the future of the hospital and HospitalWorks makes the task easier.
